

The Pampered Foot Consent to Photograph

Digital photography is utilized to document the progress of your treatment, to ensure the correct patient is being treated with appropriate documentation and, at times, for the education of others. While this is an invaluable tool for documentation and communication between health professionals, you have the choices as to whether you would like your feet and lower legs photographed. Additionally, should you consent to digital photography you have choices as to how your photographs are used.

Documentation and Treatment

- ___ I **consent** to the digital photography of my feet and lower legs for the purpose of tracking the progress of my treatment.
- ___ I **do not consent** to the digital photography of my feet and lower legs for the purpose of tracking the progress of my treatment.

Education

- ___ I **consent** to the digital photography of my feet and lower extremities for the purpose of advancing nursing education. I understand that these photographs will be used to demonstrate various foot and nail conditions as well as before and after comparisons of treatment effectiveness. I understand I will never be identified in any way in these photos, in teaching documents or in discussion.
- ___ I **do not consent** to digital photography of my feet and lower extremities for the purpose of advancing nursing education.

Marketing

- ___ I **consent** to digital photographs of before and after comparisons of my feet and lower legs in marketing materials for The Pampered Foot Mobile foot care, in printed media or on-line. I understand my identity will never be revealed.
- ___ I **do not consent** to digital photographs of before and after comparisons of my feet and lower legs in marketing materials for The Pampered Foot Mobile foot care.
